

MUHAMMAD AHMAD FAIZAN

AI & Backend Engineer | Python | LLMs | FastAPI | Automation

Faisalabad, Pakistan | +92 309 1079806 | m.ahmadfaizan30@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Python Backend & AI Engineer with hands-on experience building AI-powered applications, backend systems, and workflow automation solutions. Experienced in FastAPI, Django, PostgreSQL, REST APIs, and LLM integrations including Gemini and LLaMA. Delivered paid client projects involving automation, backend development, and business process optimization. Built AI-powered applications including resume screening systems, AI chat applications, and forecasting tools. Seeking opportunities to contribute to AI, automation, and backend engineering projects.

EDUCATION

BS Software Engineering

National Textile University, Faisalabad

PROFESSIONAL EXPERIENCE

Freelance Python Developer | *Client Projects 2024 – Present*

Successfully delivered multiple paid client projects:

- **Shopify Email Automation** - Developed 5 AI-powered automation agents for Shopify store marketing using Zapier and Klaviyo. Implemented customer segmentation, automated email campaigns, and follow-up triggers. Client reported improved engagement metrics.
- **North Steel Financial Model** - Built complete financial analysis and forecasting model using Excel. Created structured sheets for revenue tracking, expense management, profit/loss analysis, and trend forecasting. Delivered decision-ready reports for client management.
- **E-commerce Platform (French Client)** - Collaborated with team of 2 developers to build and maintain e-commerce application. Responsible for Django backend implementation, REST API development, and PostgreSQL database architecture.

Python Developer Intern | SoftBeck Limited

June 2025 – August 2025

- Developed and enhanced Python-based backend solutions and automation workflows.
- Integrated LLaMA 3 and Gemini APIs for AI-powered market research functionality.
- Worked with REST APIs, data processing workflows, and backend service integrations.
- Reviewed, tested, and optimized Python scripts to improve reliability and maintainability.

KEY PROJECTS

Infra – AI Resume Screening SaaS Platform

- Developed backend services using FastAPI and PostgreSQL for resume parsing and candidate management.
- Implemented JWT authentication, REST APIs, and database models.
- Built NLP-powered skill extraction using spaCy for candidate-job matching.
- Designed scalable SaaS architecture supporting resume uploads, filtering, and analytics.

AI Lead Qualification Automation System

- Built an AI-powered lead qualification workflow using n8n to automatically evaluate and categorize incoming leads.
- Integrated LLM-based decision logic to score leads based on business criteria.
- Reduced manual review effort through automated lead assessment and routing.

AI-Based Deepfake Detection System (Final Year Project)

- Developed a deepfake image detection system using deep learning techniques.
- Trained and evaluated EfficientNet-B0 model for binary image classification.
- Built FastAPI backend services for model inference and prediction.
- Implemented explainable AI techniques to improve model transparency.

NeuroTalk – AI Smart Chat Application

- Developed AI-powered chat application with real-time messaging and Gemini integration.

- Implemented authentication, contact management, persistent sessions, and AI-assisted conversations.

Stock Analysis & Forecasting System

- Built real-time stock market dashboard with interactive visualizations.
- Implemented SARIMA forecasting models for future stock price prediction.
- Integrated live market data and performance evaluation metrics.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript (Basic)

Backend Development: FastAPI, Django, Flask, REST APIs

Databases: PostgreSQL, SQLite, Firebase

AI & Machine Learning: LLM APIs (Gemini, LLaMA, OpenAI), NLP (spaCy), Deep Learning, Computer Vision, Time Series Forecasting (SARIMA)

Automation & Integration: n8n, apier, Klaviyo, Workflow Automation, API Integration

Tools: Git, GitHub, Jupyter, Streamlit

Cloud: Google Cloud, Azure Functions (Basic), Azure DevOps (Basic)

CERTIFICATIONS

- Data Analytics & Business Intelligence – DigiSkills
- Python – Kaggle
- SQL for Data Science – University of California
- Data Science Fundamentals – IBM
